

The following Review appeared in the July edition of MagicSeen by Mark Leveridge. I wonder what he is on about?

Lotz of Magic for Kidz
by John Breeds

...this new 214 page large size softback publication is very much centred on the magic routines that have earned John Breeds an enviable reputation as a first rate performer.

Over the course of 36 chapters John reveals a wide range of innovative magic routines as well as passing on a huge amount of fabulous advice and great gags and patter lines.

...the material itself is really fantastic. It is practical, very funny, innovative and full of great lines and presentations. There are few books on children's magic out there which contain so much original, commercial magic for kid show entertainment... ...you will have some brilliant effects to enhance your current shows. ML 2018.
